

The importance of switching off

“

IF YOU DON'T MAKE
TIME FOR YOUR

wellness

YOU'LL BE FORCED TO
MAKE TIME FOR YOUR

illness

SYMPTOMS OF STRESS

PHYSICAL

- Nausea
- Insomnia
- Aches & pains
- Headache

PSYCHOLOGICAL

- Forgetfulness
- Unable to concentrate
- Unable to make decisions
- Overwhelmed.

EMOTIONAL

- Irritable
- Mood swings
- Palpitations
- Restless.

Stress kills

FIGHT AND FLIGHT ... THEN REST AND DIGEST

We are all working hard at the moment.
Our body is flooded with adrenaline and cortisol to get us through the day

These chemicals work well to get us to a place of safety, but they can lead to high blood pressure, obesity, diabetes, heart disease and stroke

That is why rest and digest is critical, our body needs to recharge and reset

WHY WORK LESS AND REST MORE?

PRODUCTIVITY

- For every hour you work over 40 hours in a week, productivity drops ... you are working harder to achieve less

*Bruce Daisley,
The Joy of Work*

SLEEP

- If you're sleeping for less than seven hours a night you're doing yourself a disservice as grave as that of smoking

*Matthew Walker,
Why We Sleep*

REST

- insufficient rest is highly correlated with increased stress as well as conditions such as anxiety and depression

*Brene Brown,
The Gifts of Imperfection*

How to stay well

Stop trying to be superhuman

Enjoy a little pet therapy

Appreciate nature and enjoy the outdoors

Power off sometimes

Smile & laugh

Gratitude – keep a journal

Be creative – enjoy art and culture

Learn something new

Sleep

Diet – eat the rainbow

Connect with others

Be active – whatever is right for you
